

Nha Trang City, March 26, 2012

To: Ms. Paige Stringer, Executive Director of the Global Foundation for Children with Hearing Loss.

Firstly, on behalf of Khanh Hoa Rehabilitation Center, I would like to wish you good health. Thank you, Paige, and your team, experts of the Global Foundation for Children with Hearing Loss in your past trip to Nha Trang.

During the period from 12 to 16 of March, you experts from the Global Foundation for Children with Hearing Loss provided a training course on Pediatric Audiology and Auditory- Verbal therapy for children with hearing loss. In addition, your delegation also did hearing tests and counselled families of hearing-impaired children as well as supported a number of hearing aids for children in Khanh Hoa Province in general and specialized facilities such as Khanh Hoa Rehabilitation Center, Hand In Hand and Sao Mai school.

What you have done is very meaningful and wins the unanimity of the teachers and staff working in the field of disability in general and hearing loss in particular. Through the training course, our teachers have learned a lot about early intervention for children. We are also thankful for the positive comments given by experts after the training, which help us to gradually improve the Auditory- Verbal education for children with hearing loss under conditions suitable to our real situation. After the training, several parents become aware of the importance of early intervention. What we hope in the future with your help is to assist poor hearing-impaired children with hearing aids; conduct more training courses on Early Intervention and Therapy for children with hearing loss; Methods of cooperation between teachers and parents.

Once again, we wish you all good health and hope to see you again in Nha Trang. Wishing success to you in your life.

Sincerely

*Sinh, Khanh Hoa Rehabilitation and Education Center for disabled Children*
